RITAJ BADR ALHARBI

ARTIFICIAL INTELLIGENCE ENGINEER

Makkah, Saudi Arabia • +966533218847 • Ritajharbi@hotmail.com • LinkedIn • Portfolio

SUMMARY

Artificial Intelligence graduate with hands-on experience in machine learning, computer vision, and AI-powered applications. Passionate about developing intelligent solutions and continuously expanding technical skills while contributing to innovative projects.

EDUCATION

Umm Al-Qura University Graduated: June 2026

Bachelor of Artificial Intelligence & Computer Science

GPA: 3.73/4.00 (Excellent, Second-Class Honors)

TECHNICAL SKILLS

Programming & Languages:	Python, Java, SQL, Linux, MATLAB
AI & Machine Learning:	PyTorch, Computer Vision, ViT (Vision Transformers), Transfer Learning, Fine-Tuning, Hugging Face, OpenCV, MediaPipe, GPT-4
Data & Web Frameworks:	pandas, Flask, Firebase
Tools & Productivity:	Microsoft Word, Canva, Figma, Git

PROJECTS

Haden | AI Companion for Adopted Kids

- Developed an AI-powered companion to monitor children's emotional well-being through voice and facial analysis.
- Contributed to the Facial Emotion Detection module by developing and fine-tuning a Vision Transformer (ViT) model with image preprocessing using OpenCV and MediaPipe.
- Contributed to the AI Chatbot by integrating GPT-4, Whisper, and Text-to-Speech (TTS) to enable safe, child-friendly voice interactions and automated report generation.
- Technologies: Python, PyTorch, Hugging Face, OpenCV, MediaPipe, GPT-4, Whisper, Firebase, Flutter.

Pneumonia Detection System

- Developed a deep learning image classification system using Transfer Learning and Fine-Tuning to analyze chest X-ray scans for pneumonia detection.
- Utilized ResNet18 architecture implemented in PyTorch for robust feature extraction and accurate medical image classification.

EXPERIENCE & TRAINING

Cooperative Training - Heraa General Hospital March 2025 - August 2025

- Hands-on work in the Digital Health Department, focusing on AI in medical imaging and healthcare IT.
- Learned X-ray image analysis, hospital database systems, and remote troubleshooting.
- Trained in PC hardware disassembly, component organization, and system setup.

ACHIEVEMENTS

Nabatron - TCS Sustainathon Hackathon (KACST)

- Participated in the TCS Sustainathon hackathon at KACST as part of Nabatron team. Selected among 400+ teams and ranked in the Top 10 winning teams.
- Collaborated with a multidisciplinary team to develop an innovative sustainability-focused solution.

CERTIFICATES

- 1. Python Basics - Coursera (KAUST)
- 2. Supercharge Your Data Analytics with Generative AI - IBM Skills Build
- 3. Fundamentals of Artificial Intelligence - SDAIA
- 4. English Language Course - Saudi High Women's Institute for Training
- 5. Word Processing Program (Microsoft Word) - Tadreeb
- 6. Data Manipulation with pandas - Datacamp

LANGUAGES

- Arabic (Native)
- English (Professional)
